
The goal of the Community Impact Grant is to deepen the impact St. John Fisher University students and faculty can make in the community and enhance students' leadership, grant writing, and professional communication skills. Funds can be proposed for two uses: 1) to provide the materials needed for successful implementation of a Community-Engaged Learning project, and 2) to fund items that will be provided to the community partner that deepen the impact of community engagement and can be left behind for future organizational benefit. Students are encouraged to apply, but faculty may apply for a CI Grant with student input. Here are past recipient examples:

CEL Project Materials Grants:

- Bound "showcase" reports to Pencils and Paper.
- Refreshments and gifts for end of semester celebration.
- Wednesday Wellness Workshops and tabling materials for Sociology team.
- Science kits for the Science Enrichment sessions and Fair with East Rochester ES.

Deepened Community Impact Grants:
